SciTech Enrichment Course fuse Science and Technology into a single course

Are you running out of ideas on how to inspire your students to come up with new ideas for their Design & Technology projects? Have you ever wonder about teaching both Design & Technology and Science in one lesson?

SciTech Enrichment Course allows students to learn ohm's law and solder at the same time.

Our enrichment course combines the best of both worlds – Science & Design and Technology, allowing students to learn electricity and electronics in a fun way! Relating the two subjects also enable students to think in a wider range and comes up with creative and innovative ideas for their projects.

In this 3-hour course, students will get to explore, design and construct electronic circuits on a PC and then implement their ideas during a hands-on session midway through the course. Electronic components will be provided for the students for the hands-on session.

Please call our Sales Representatives at **6749 3681/6749 3656**
for a **FREE Demo**.
