## SciTech Enrichment Course fuse Science and Technology into a single course

Are you running out of ideas on how to inspire your students to come up with new ideas for their Science projects? Have you ever wonder about teaching both Design & Technology and Science in one lesson?

### SciTech Enrichment Course allows students to learn ohm's law and solder at the same time.

Our enrichment course combines the best of both worlds – Science & Design and Technology, allowing students to learn electricity and electronics in a fun way! Relating the two subjects also enable students to have a greater understanding in ohms law, resistors, circuits and more!

In this 3-hour course, students will get to explore, design and construct electronic circuits on a PC and then implement their ideas during a hands-on session midway through the course. Electronic components will be provided for the students for the hands-on session.

Please call our Sales Representatives at **6749 3681/6749 3656**  
for a **FREE Demo**.
